Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CL

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6, 13, 18-20, 52-54, and 56-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herubel et al. (US Pat. 6,464,065).

See the attached marked up copies of Herubel et al. cover sheet, figure 2, figure 5, figure 6, and specification column 5, depicting the claimed features. Herubel et al. teaches the claimed invention except for having duplicating the plurality of individual belt conveyors in a conveying direction, instead, Herubel et al only teach one set of a plurality of side by side belt conveyors. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide more than one side by side belt conveyors on Herubel et al. in order further increase the capability of the Herubel et al. conveyor, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

The Herubel et al. device is capable of rotating an article based on their disclosure even though he does not disclose this feature. It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so

perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Allowable Subject Matter

3. Claims 21-29 are allowed.
